DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 21 is rejected under 35 U.S.C. 102(e) as being anticipated by Autruong (U.S. Patent No. 5,150,368).

Regarding claim 21, Autruong teaches an extraction unit extracting the identifier (e.g. “checksum” in Abstract) stored in a predetermined position in each of a plurality of wavelength components; a determination unit (column 4 lines 53-67) determining whether or not said identifier stored in a predetermined position in each of the plurality of wavelengths components is normal; and judgment unit judging (column 4 lines 53-67) whether or not each of the plurality of wavelength components in an optical signal is down and whether said identifier is abnormal for each of said wavelength components.

Allowable Subject Matter

3. Claims 1-3, 8-13, 18, and 20 are allowed. The applicant is reminded that claims 4-7, 14-17, and 19 remain pending in the case, but are withdrawn as being directed to a non-elected invention.

Response to Arguments

4. Applicant's arguments filed 4/16/07 have been fully considered but they are not persuasive. As noted in the office action the examiner interprets Autruong's determination unit and judgment unit to be one in the same.
